

List Report - A specific guideline

List Report in general:

Employees (5)

Name	ID	Type	Market	Created At
Michael Scott	D053188	Manager	US East More (24)	Mar 6, 2018
Dwight K. Schrute	D062313	Sales, Managers Assistant	APJ	Jun 12, 2018
Jim Halpert	D018763	Sales	EMEA	Jun 22, 2018
Pam Halpert	D018765	Assistant	LA More (11)	Jan 31, 2012
Ryan Howard	D051225	Intern	LA	Dec 15, 2000

Interaction Buttons:

Clear: Clear all filter values

Hide Filter Bar: Use the standard behavior offered by sapui5 control.

Adapt Filters (X): Use the standard behavior offered by sapui5 control. See [example by KFP](#).

Go: Depending on the use case, you can either trigger the filter search by pressing enter or the Go button. Or only via Go Button. This needs to be discussed with UX team upfront.

Add: The add button should be placed in the table toolbar. See screenshot. Clicking on the button will navigate to a new full page screen depending on the added object.

Settings: The add button should be placed in the table toolbar. See screenshot and [example by KFP](#).

Pin: Use the standard behavior offered by sapui5 control.

Search field interaction:

Search range

In this example the search field will only search for Employee Names. You can also add other values like Employee ID to the search range.

The List Report also offers the opportunity to have only general global search field at the beginning of the filters.

1. Searching for a non existing entry:

(Video in subfolder)

2. Searching for an incomplete entry:

(Video in subfolder)

Filter interaction:

Filter value

Please note that you can always use patterns like **=VALUE** or ***VALUE*** to improve your search.

The filters of the List Report can be categorized in different controls:

1. Filter with incomplete value (=MIC):

(Video in subfolder)

2. Filter with complete value (=MICHAEL):

(Video in subfolder)

3. Value Help (*HOW*):

(Video in subfolder)
