I'm focused on creating a coherent experience through
research, design, and development.

Oct 16 - present

UX Design Specialist, SAP

As a UX Designer at SAP Subscription Billing, I began my journey specializing in complex pricing structures such as tier or volume pricing, with a strong focus on usage-based calculations. In this role, I led a 6-person UX team and effectively communicated key decisions and innovations, while also presenting and consulting at international workshops.

In my subsequent role as a UX Designer at SAP Quote to Cash, I am responsible for designing the Sales Order user interface. This interface is an integral part of the comprehensive end-to-end process and is used by approximately 18,000 companies worldwide. Working closely with project managers and developers, I am able to deliver a successful user interface design.

My day-to-day work includes conducting customer research, designing mockups, and front-end development.

Aug 19 - Jan 2023

Co-Founder, Internespo.com

I co-founded and developed a college soccer web app for nearly 4 years, taking charge of design, research, and development. I conducted extensive user research and market analysis to create a modern and user-friendly app, designed the UI/UX and visual elements, and developed the modern app with front-end and back-end technologies. Furthermore, I ensured that the app met the needs of college soccer enthusiasts by providing an engaging platform for following their favorite teams and players.

Education

M.S. Human Computer Interaction (HCI)

Bauhaus University Weimar, DE

2021 - present

B.S. Business Informatics, Computer Sc,

Cooperative State Univ. Mannheim, DE

2013 - 2016

Skills

Design

Personas, Workflows, Wireframes,
Prototypes, Figma
